

Valuation for Insurance Replacement

April 21st 2021

Dear (Your Name,)

In accordance with your instructions, I am pleased to enclose your Valuation Schedule for the purpose of Insurance Replacement, Ref: GB00000/0000/00/00

Included with your valuation you will find an Insurer Notice, which you should send to your insurance provider immediately. You do not need to send a copy of the valuation itself this should be kept safely and securely by you.

Your valuation has also been registered to the secure e-register database using only your unique reference numbers as above for your complete protection. This allows your insurance company and the police secure and exclusive access to your details, ensuring you are properly protected in the event of a loss or theft. It also provides your insurer with adequate information about your items should they need to be replaced. You can also view and manage your valuations via the My Portfolio section of our website - please see the relevant page within this appraisal for instructions.

The values applied to your items within the valuation are based on the most appropriate markets for replacing each individual piece, and these markets will vary according to the age, design and workmanship of the jewellery amongst other factors. As diamonds and precious metals are generally traded in dollars the rates used were gold \$1777.85 per ounce and the dollar price at 1.3964. The values represent the Valuer's professional opinion of the approximate replacement value within these stated markets and are valid only for the purpose specified. This document is not to be reproduced or used for the purpose of re-sale including internet auction sites.

The Notes to the Schedule are an explanation of the valuation process, its limitations and the abbreviations used. It is important that these notes are read in conjunction with the main schedule text to give you a clear understanding of the valuation. Any further notes relating to a specific item will be found either within the main description of the piece or on a separate sheet within your valuation.

All the items have been thoroughly examined with great care to ensure that your valuation is as comprehensive and fully researched as possible.

We hope that you will find your valuation both interesting and informative although should you have any queries, please do not hesitate to contact us we are delighted to help in any way we can.

Yours sincerely,

David Baker FIRV 92708 BA(Hons) FGA DGA

Valuation for Insurance Replacement

Schedule

I Watch	Wrist-Lady's Cartier Tank francaise Watch	
Design	Wrist-Lady's Make: Cartier, Model: Tank francaise, Model No: 2384, Serial No: 619489MZ	
Case	Shape: Rectangular, Material: Stainless steel	
Dimensions	Length: 25.00mm, Width: 20.00mm	
Dial	Function: Analogue, Colour: Mother of pearl	
Crown	Design: Synthetic Sapphire Crown	
Movement	Type: Quartz	
Bracelet	Style: Brick link, Materials: Steel & 18ct Gold	
General	Gross Weight: 57.90 grams, Period: Modern	
Condition	Good	
Valuer Notes	Authenticity has been assessed on external examination only. The watch case, due to the nature of the specialist seal, has not been opened and therefore authenticity of the movement can not be checked or verified. This style is now discontinued with the manufacturer, however an equivalent model is still available from their range. This replacement may differ in appearance from the model valued, but will have similar and comparable characteristics, functions and movement.	
Schedule Notes	New for old (NFO). See Notes to the Schedule	
Valuation		NFO £5,350.00

Total Schedule Value £5,350.00
(Five Thousand, Three Hundred and Fifty Pounds and Zero Pence)

Appraiser's Declaration

I hereby certify that the above items, as seen on the date shown, have been valued at a total of £5,350.00 and have been personally examined and valued by me for the purposes of Insurance Replacement. This document is not to be reproduced or used for the purpose of re-sale including internet auction sites.
This valuation was produced for Sarah Charig by David Baker FIRV 92708 BA(Hons) FGA DGA on April 21st 2021.

Valuation for Insurance Replacement

Glossary

Diamond

GIA: Gemological Institute of America. An organisation in the forefront of gemmological research, education and gemstone analysis.

IGI: International Gemological Institute – one of the world’s largest independent gem certification institutes for diamonds and coloured gemstones.

HRD: The HRD Antwerp diamond laboratory has established itself as one of the global laboratories in diamond certification.

The 4 C's: A diamonds value, rarity and beauty are determined by factors that are commonly known as the 4 C's. These are colour, clarity, carat and cut.

Colour grade: The classification of body colour of cut diamonds. There are several colour grades used throughout the World, the scale used in this report is that of the GIA. The range is from colourless (“D”) to yellow, brown or grey (“Z”), beyond is termed “Fancy”.

Clarity: In gemstones, the incidence of inclusions and surface blemishes. There are several clarity grading scales throughout the world. The clarity grading scale used in this report is that of the G.I.A. Some of the grades are split (e.g. VVS1 and VVS2). Size, position and number of inclusions determine the distinction between the split grades. The descriptions below assume an expert eye using a 10X loupe corrected for spherical aberration.

FL: Totally free of any internal or external blemishes.

IF: Free of any internal blemishes.

VVS: Extremely small internal blemishes that are difficult to find to extremely hard to find.

VS: Very small internal blemishes that range from not too difficult to detect to easy to detect.

SI: Small internal inclusions that are very easy to find.

I1-I2: Internal characteristics that are visible to the trained, but unaided eye. May diminish the brilliance.

I3: Large and/or numerous internal blemishes that are easily visible to the naked eye. Brilliance is diminished.

Carat: Diamonds are measured in carats taking into account the weight rather than the size. Carats are split into points where 100 points is equal to one carat. For example:

½ carat diamond – 50 points or 0.50 carat diamond

¼ carat diamond – 25 points or 0.25 carat diamond

Cut: The cut of a diamond refers to their proportion and finish. A rough diamond can be transformed into a gleaming diamond by polishing tiny facets into the rough stone. Facets are flat, polished surfaces on a diamond and a well cut and proportioned facet will make good use of light releasing the diamond’s brilliance. A diamond can be cut in various ways; to be heavier, gaining more value, or to hide or minimise inclusions. Symmetry, proportion, and how polished a diamond is will determine the quality of the cut. These can vary from diamond to diamond, so the shape and the quality are important factors when choosing a diamond.

Hallmark: A series of marks stamped on gold, silver and platinum articles. It means that the item has been independently tested and guarantees that it conforms to all legal standards of fineness. These tests are carried out by the four Assay Offices currently operated in the UK – London, Birmingham, Sheffield and Edinburgh.

Natural: Generally taken as substance that has formed without intervention from man.

Synthetic: An artificially produced gem material having the physical, chemical and optical properties of a natural counterpart.

Simulated: A material designed to mimic the characteristics of its natural counterpart.

Fluorescence: Refers to the emission of visible light from a diamond when subjected to ultraviolet radiation. The terms for describing the strength of fluorescence are: none, faint, medium, strong, and very strong.

Valuation for Insurance Replacement

Notes to the Schedule

A valuation schedule can be quite a complex document, so to help you better understand what it contains and why, as well as a few of the limitations that are applicable to the valuation process itself, the following explanatory notes have been compiled for your information. These should be read in conjunction with the attached schedule and the transmittal letter, and should you like any further assistance or have any queries please feel free to discuss these with the valuer.

General Matters

- 1. In accordance with the NAJ Principles of Best Practice for Valuers, the utmost care and precaution has been taken to present an honest and unbiased report on the quality and value of the goods contained in this schedule. File copies of all pertinent information are maintained for a period of six years for updating and/or future reference.*
- 2. The value(s) of the article(s) specified in this schedule may reasonably vary from the value(s) assigned to the same article(s) by other valuers. Such variances do not necessarily constitute error on the part of any valuer concerned. In the event of serious dispute, the valuer agrees to abide by the Resolution of Disputes Procedure specified by the NAJ Principles of Best Practice for Valuers. Should any detail and/or value stated within this schedule become the subject of dispute and it subsequently transpires that material information relating to that detail and/or value was withheld, the valuer reserves the right to recall this schedule and make any amendments as may be necessary. In this event, the valuer shall be entitled to levy reasonable additional fees for the extra work incurred.*
- 3. The values stated in the schedule do not constitute an offer to purchase nor are they intended to suggest figures likely to be raised in the event of a sale (unless the valuation is specifically for that purpose).*
- 4. Where it is applicable and unless otherwise stated, the values given in the schedule include Value Added Tax (VAT) at whatever rate is in force at the date of the schedule.*
- 5. Articles are valued only with regard to materials, workmanship, scarcity and relevant market forces and no account is taken of any sentimental value.*
- 6. It is recommended that a valuation for insurance be updated regularly. This provides an opportunity to check and clean the articles thoroughly, and in such cases a reduced fee may be applicable. Customers are reminded that values do not necessarily correspond to the prevailing rate of inflation, and the practice of index-linking used by some insurers may prove to be misleading and inaccurate, and may result in either overpayment of premiums or underinsurance in the event of a claim.*
- 7. All unhallmarked articles contained in this schedule are valued as specified.*
- 8. Any items detailed in this valuation which, to the best of the valuer's knowledge and belief, have either been sold, restored or repaired by this establishment have been endorsed accordingly. Notwithstanding this, the valuer has faithfully complied with due diligence and employed the NAJ's Institute of Registered Valuers' recommended impartial methodology in determining all the values expressed in this valuation. For the avoidance of doubt, no values have been influenced by, or take into account, the sums paid in relation to those items.*
- 9. The valuer has not investigated title to the property detailed in this valuation and the inclusion of any one person's details does not convey any inference, indication or verification of that person's ownership and/or title to the property specified herein.*
- 10. Colour reproduction in digital images may not be the true colours of the component parts of the jewellery items illustrated. More accurate colour assessments of diamonds and/or gemstones may be referenced in the narrative section of this document. Furthermore, invariably the overall dimensions of the digital images do not replicate the actual size of the pieces illustrated; neither do they necessarily bear any correlation to each other in this respect. The actual dimensions of the items may be referenced in the narrative section of this document. Accordingly, any images contained in this report are for guidance only.*

Valuation for Insurance Replacement

Notes to the Schedule

Gemstone Matters

11. Unless otherwise stated, all dimensions and estimated weights of gemstones in this schedule have been determined without unsetting the stones and are, therefore, only approximate because of limitations imposed by the mount. Estimated weights are normally calculated by applying standard formulae to the measurements taken.

12. Unless otherwise stated, any quality assessments attributed to diamonds in this schedule have been determined without unsetting the stones and are, therefore, to be considered only as estimated because of limitations imposed by the mount. Where stated, colour assessment has been undertaken against graded comparison stones. The quality assessment system adopted in this schedule has been based on the diamond grading scale recommended by the GIA (Gemological Institute of America). In the event of serious doubt, it is recommended that a report be obtained from a recognised independent gem testing laboratory.

13. Unless otherwise stated, any colour assessments attributed to coloured gemstones in this schedule have been determined without unsetting the stones and are, therefore, to be considered only as probable because of limitations imposed by the mount. Where stated, colour assessment has been undertaken utilising the World of Color system and/or other internationally recognised and accepted grading systems.

Whilst the valuer is reasonably satisfied that all such descriptions are correct, no responsibility can be assumed if subsequent unsetting and testing disproves these opinions. In the event of serious doubt, it is recommended that a report be obtained from a recognised independent gem testing laboratory.

14. Unless otherwise stated, any article which incorporates pearls has been valued according to the opinion expressed, i.e. cultured, natural. Unless otherwise stated, none has been subjected to testing by X-ray to confirm this opinion.

15. As a Member/Fellow of the National Association of Jewellers, the valuer makes use of the guidelines concerning gemstone nomenclature recommended by the international governing body, CIBJO.

16. With the increase in production of synthetic diamonds, mostly in small melee sizes, it has become increasingly difficult to detect and/or identify whether all diamond melee in an item of jewellery are natural, treated or synthetic. Additionally, there is a recent increase in the larger sizes being submitted to the gemstone testing laboratories and subsequently identified as being synthetic.

Currently, few valuers or retailers have the necessary equipment to screen out diamonds which might potentially have issues of treatments or with not being of natural origin. The small number that can be successfully screened out still need to be submitted to a laboratory for definitive scientific testing which can be an expensive process. Therefore, valuers may make certain assumptions as to the identity of small melee diamonds. Due to the relatively small size of these stones the valuation is unlikely to be significantly affected by a more accurate identification. In the larger diamond sizes, those without recognised diamond reports, and from an unknown source of supply, it is recommended that the owner is advised to have the diamond/s sent to a laboratory for a report to be carried out.

Insurance Matters

17. The following abbreviations are used to explain the categories of replacement values for the purpose of insurance replacement.

NRV New Replacement Value. This category of value represents the average current UK retail replacement price of a visually similar new item of equivalent quality. Convention dictates that this category of value is usually ascribed to items which, in the valuer's opinion, are of recent manufacture. It does not, however, allow for recreating a handmade facsimile of the original.

NFOV New For Old Value. This category of value embraces the same parameters as new replacement value but is ascribed to second-hand items when the owner discloses to the valuer that, in the event of a loss, the basis of settlement specified in their insurance policy is 'new for old'. Many obsolete wristwatches are very often placed into this category of value and the ascribed value reflects the current new replacement price of a similar model of equivalent quality which may, or may not, be the same brand name.

Valuation for Insurance Replacement

Notes to the Schedule

SHRV Second-hand Replacement Value. This category of value represents the average current UK retail replacement price of a visually similar second-hand comparable item of equivalent quality and in like condition. The value expressed makes no allowance whatsoever for the current cost of individual replacement component parts in the event of a partial loss; neither does it take into account the cost of restoring or recreating the article in question in the event of major accidental damage. Convention dictates that this value is usually ascribed to items which, in the valuer's opinion, have been manufactured less than 100 years ago, but where NRV/NFOV is not appropriate.

ARV Antique Replacement Value. This category of value represents the average current UK retail replacement price of a visually similar antique comparable item of equivalent quality and in like condition. The value stated makes no allowance whatsoever for the current cost of individual replacement component parts in the event of a partial loss; neither does it take into account the cost of restoring or recreating the article in question in the event of major accidental damage. Convention dictates that this value is usually ascribed to items which, in the valuer's opinion, have been manufactured over 100 years ago.

FV Facsimile Value. This value reflects the likely average current replacement price of creating a facsimile of the original utilising the same quality materials and processes. It should be noted that this is a type of valuation rarely used and the vast majority of modern jewellery will, even if handmade, be adequately covered by the standard new replacement qualification.

Nominal Values. Convention dictates that this category of value is usually ascribed to items that are below the insured's single item limit and, as such, are not required to be specified on their policy. Nominal values are based primarily upon the valuer's knowledge and experience of visually similar comparable pieces of equivalent quality and all such values are to be considered as approximate only because the pieces have not been appraised in any great detail.

Public Auction. (high auction estimate) - when this market is selected as entirely appropriate and/or acceptable to all interested parties as being the medium in which replacement is to take place, the replacement values ascribed to the property reflect the likely presale high auction estimated prices likely to be achieved at this level in the UK, notwithstanding that the only categories of value that can possibly be contemplated in this market are either second-hand replacement value or antique replacement value (i.e. SHRV and ARV). Such values reflect the condition the property is in at the date of appraisal and are based upon the higher limit of estimated auction prices plus an appropriate purchaser's commission.

18. Agreed Value. Not strictly a category of value, Agreed Value is more a contractual obligation by the insurer, who will pay the insured a predetermined sum of money in the event of loss – in return for a premium.

The insurer and insured can use any category of value at any market level (e.g. NRV, ARV, SHRV, FV, NFOV, NOM at retail, auction, wholesale [trade], internet, TV channel, etc.) to decide on an Agreed Value.

Generally, insurers accept Agreed Values for high net-worth jewellery where it is more important to the client to keep a lower premium

19. Partial loss/damage. Regardless of the type of value ascribed to an article, it should be noted that the value makes no pro rata allowance for the current cost of individual component parts in the event of a partial loss, nor does it take into account the cost of restoring or recreating the article in question in the event of major accidental damage. It is accepted by insurers that the costs of selecting replacement gems and repair work to settings etc. generally cannot be directly related to the value of an article in its entirety. This is particularly relevant to pairs and/or sets or articles valued as either SHRV or ARV.

20. All values given represent average approximate retail replacement prices within the various categories specified - i.e. NRV/NFOV, SHRV, ARV and FV. These values do not necessarily reflect the price at which the valued item(s) may be purchased from any particular retailer but attempt to reflect an average of a broad range of current prices of such items available from retailers offering similar goods in the appropriate market.

21. All values given for articles of foreign manufacture represent approximate retail replacement prices (as defined above) which attempt to reflect an average of a broad range of current prices of such articles available from retailers offering goods of comparable quality to consumers in the UK.

Valuation for Insurance Replacement

Notes to the Schedule

22. *Obsolete watches: the stated value for any obsolete watch given a NRV/NFOV figure represents the current new replacement price for the nearest model of equivalent quality, which may, or may not, be of the same brand. Watches valued for second-hand replacement (SHRV) are generally (but not necessarily) likely to be more than 30 years old, and will be so valued because they are of a brand/style/type no longer available, or will be in a condition that reflects the age and wear provided by the passing years. Insurers normally accept the distinctions, and will normally take the stance that replacement will be on the basis of 'equivalence' rather than 'betterment', and it is this principle that guides the valuer in the valuation method applied.*

23. *Post Loss Assessment. A Post Loss Assessment Report must not be confused with formal valuations as it is not a valuation. They are presented in a totally different format, clearly stating the valuer has not examined the property. A post loss assessment is an opinion of value based upon information researched and compiled by the valuer in relation to the missing property.*

24. Levels of Value

It is customary that valuations for the purpose of insurance replacement ordinarily reflect likely retail values at UK 'high street' shops/outlets. However, there are alternative sources that can be used to replace items of personal property. Unless otherwise stated, the level of replacement values ascribed in this valuation is based upon UK high street shops/outlets retail prices, but for the avoidance of doubt, the most frequently accepted levels of value acceptable to insurers are usually as follows:

Retail Shops (UK High Street) – when this market is selected as entirely appropriate and/or acceptable to all interested parties as being the medium in which replacement is to take place, the replacement values ascribed to the property reflect the likely prices normally achieved at this level, notwithstanding the categories of value adopted (i.e. NRV/NFOV, SHRV, ARV and FV).

Internet – when this market is selected as entirely appropriate and/or acceptable to all parties as being the medium in which replacement is to take place, the replacement values ascribed to the property reflect the likely prices normally achieved at this level by UK based traders. The normal categories of value adopted within this market are usually NRV/NFOV, SHRV and ARV.

Television Shopping Channels – when this market is selected as entirely appropriate and/or acceptable to all parties as being the medium in which replacement is to take place, the replacement values ascribed to the property reflect the likely prices normally achieved at this level by UK based traders. The normal categories of value adopted within this market are usually NRV and NFOV.

25. *References to condition are as follows (please note this only affects values ascribed as SHRV and ARV):-*

EXCELLENT- *in the valuer's opinion, the article is in 'as new' condition.*

VERY GOOD- *in the valuer's opinion, the article is in exceptional condition in relation to its age and does not display any obvious evidence of repairs and/or restorations.*

GOOD– *in the valuer's opinion, the article is in better than average condition in relation to its age and may display evidence of discreet repairs and/or sympathetic restorations.*

FAIR- *in the valuer's opinion, the article is in average condition in relation to its age and may display evidence of acceptable repairs and/or restorations.*

POOR- *in the valuer's opinion, the article is in lower than average condition in relation to its age and may either display obvious repairs and/or restorations or be in need of repairs and/or restorations.*

VERY POOR- *in the valuer's opinion, the article is in a dilapidated condition in relation to its age and may have missing or broken components and/or display obvious evidence of poor quality repairs and/or restorations.*

SCRAP- *in the valuer's opinion, this is when the article is in a decrepit condition and/or is literally falling apart with no possible and/or viable prospect of repair/restoration.*

Valuation for Insurance Replacement

Notes to the Schedule

Miscellaneous Matters

26. In the event of this valuation being for the purpose of **probate**, the values ascribed are required to comply with Section 160 of The Inheritance Act 1984. Such values represent the estimated **gross** open market prices most reasonably likely to be achieved for the property at a hypothetical public auction sale **at the date of death**. If appropriate, the estimated **gross** open market prices can reflect a hypothetical auction sale taking place within a wider marketplace than the geographical area in which the deceased resided. Such values reflect the condition the property was in at the date of death and represent the likely hypothetical 'hammer prices' and do not take into account any commissions and/or premiums payable

27. In the event of this valuation being for the purpose of **Private Sale/Sale Between Parties**, each item is valued taking the average of the researched likely Open Market figure and the retail replacement value. In the majority of circumstances this will be the Second hand retail replacement figure, including VAT, that a prospective buyer might be likely to pay in a second-hand retail outlet. The Open Market figure is based on GROSS researched mid-auction estimates for similar items offered at public auction, without deductions for commission and charges. Condition of the item has been taken into consideration in both the open market and the second-hand retail markets.

28. In the event of this valuation being for the purpose of **formal division of assets, or family division of property**, in a willing buyer/willing seller situation, unless otherwise stated, the values (or value bandings) expressed are based upon the estimated open market prices most likely to be paid by prospective buyers for the property at a hypothetical public auction sale in circumstances requiring disposal without specific time or geographical constraints. The values expressed reflect the condition the property is in at the date of appraisal and are based upon a range of hypothetical estimated auction prices between upper and lower limits and represent the likely hypothetical 'hammer prices'. They do not take into account deductions of any commissions and/or charges payable unless the valuer has been specifically instructed/requested to do so by the client or their solicitor(s).

29. In the event of this valuation being for the purpose of **divorce settlement** there are two values to be taken into consideration dependent on which party is instructing the valuer: (i) the net realisable asset: the researched likely open market hammer figure or mid auction estimate with the deduction of the seller's commission and charges; (ii) the new retail replacement value, including VAT. If the instruction is for a Court Hearing the Court will require both these values.

30. In the event of this valuation being for the purpose of **forced sale**, unless otherwise stated, the values (or value bandings) given represent the approximate net open market cash prices likely to be achieved by an immediate forced sale of the property, at the date of appraisal only, without the benefit of waiting for either more favourable market conditions or within another venue. **This value is adopted when the vendor is compelled to convert the property into cash immediately** and often reflects a discounted scrap/breakdown value of the property, which is usually significantly below that of its intrinsic value. Generally, it does not usually represent a willing buyer/willing seller situation and usually denotes cash offers likely to be made for the property by dealers and traders on the day and is **net of any commissions and/or premiums payable**. Forced sale value is the lowest of all the possible appraised values.

Limiting Conditions

31. No alteration to the description or value of any item contained either within this schedule, or to any copy thereof, shall be made by anyone other than the valuer and the valuer shall have no responsibility for any such unauthorised alteration.

32. The rendering of this schedule does not in itself commit the valuer to any further involvement, or involvement in any process of litigation including attendance in Court and the giving of oral testimony, unless arrangements are made at a reasonable time in advance and such involvement has been commissioned at an agreed customary rate per hour as of that date.

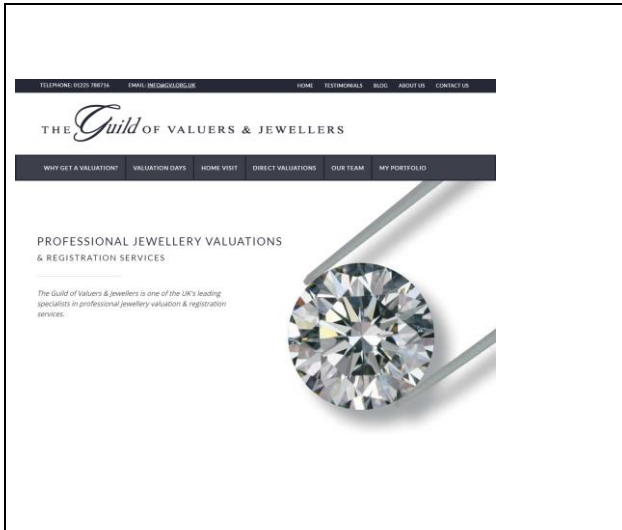

33. Any liability whatsoever on the part of the valuer is limited to the fee paid for this valuation schedule.

34. Citizens' Statutory Rights are in no way affected by reason of any of these notes to the schedule.

Valuation for Insurance Replacement

Your online jewellery portfolio

Now that you've had your items valued, make sure that you register to view your valuation online at www.gvj.org.uk

Set up your own secure profile in the “My Portfolio” section of our website and you can view your valuation online, complete with descriptions, values and digital images.

It only takes a few moments and it's completely free.

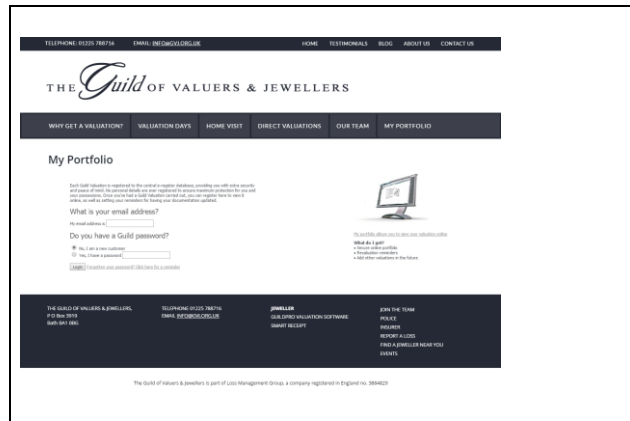

You can also:

- Set reminders for having your items revalued.
- Benefit from special offers.

What to do next...

- Go to www.gvj.org.uk
- Select My Portfolio from the top menu.
- Register your details completely free.
- Click 'Add Valuation'.
- Enter the reference numbers shown below for security.

It's that simple!

Your valuation reference numbers:

Appraisal Number

Total Value: £5,350.00

Valuation for Insurance Replacement

Instructions in the event of a loss

PLEASE READ CAREFULLY

In the event of your jewellery getting lost or stolen:

The Police - can search e-register to find a match for any recovered items and trace them back to you, the registered owner, via your reported Crime Reference Number.

Your insurance company - (with your permission) can see a limited view of your jewellery valuation online, to help them settle your claim speedily and efficiently.

Should any item included in your GuildPro valuation be either lost or stolen, it is essential that you report the loss to the police and e-register immediately. This will facilitate your insurance claim and your chance of recovering the item through the e-register Police Recovery Service.

How to report a loss to e-register:

1. Report the loss or theft to the police - they will issue you with:-
 - A Crime Reference Number or Lost Property Number
 - The Police Station name, address and telephone number
2. Report the loss to e-register by contacting your jeweller - give the following details:-
 - GuildPro valuation reference numbers (see below)
 - Description of the item - see valuation
 - Police station where the loss or theft has been reported (Station address and telephone number)
 - Crime Reference Number or Lost Property Number
 - Date of the incident
3. Report the loss to your insurer - the following information will be requested:-
 - Your policy number
 - Your Crime Reference Number or Lost Property Number
 - Your GuildPro reference numbers, which are: Ref: GB00000/0000/00/00

If you wish to check that your valuation has been registered, please log onto www.gvj.org.uk – My Portfolio

If you have any questions, please contact your jeweller.
